SHADOW
SYSTEMS

ABOUT SHADOW SYSTEMS

Shadow Systems was founded by real-world shooters who asked a simple question: why can't factory guns come with custom features?

The Shadow Systems team is made up of combat veterans, former law enforcement officers, and competitive shooters. With their unique perspectives on shooting, they have developed handgun features that vastly improve pistol shootability while maintaining bet-your-life reliability.

Shadow Systems pistols combine premium features, production pricing, exceptional shootability, and a full lifetime warranty, bringing the shooter everything they need right out of the box. While Shadow Systems pistols may be pretty enough to be safe queens, they are designed to be hardcore tools for a multitude of use cases.

Every one of our products is built in Plano, Texas with parts made in-house. There are few pistol companies that can say that they offer a product line that is truly Made in America with American labor and American parts.

LIFETIME WARRANTY

Shadow Systems pistols are backed by a limited lifetime warranty. As a Shadow Systems owner, you can be confident that your pistol is built to withstand even the hardest duty use. We stand behind every product created at Shadow Systems with our lifetime warranty supported by our world-class Technical Team. Whether or not you are the original purchaser of the firearm, we will support you for the lifetime of your pistols.

USE OF PISTOL IN SELF-DEFENSE SITUATION

If you are forced to use your Shadow Systems pistol in a self-defense situation in the United States, it is possible that you will temporarily or permanently lose possession of your Shadow Systems pistol.

If your use of your Shadow Systems pistol is deemed legally justified to the satisfaction of Shadow Systems, but the pistol is not returned to you, Shadow Systems will replace your pistol free of charge, to the extent permitted by law. This policy applies to law enforcement line of duty use in cases where the pistol was personally purchased by the officer.

TECHNICAL SUPPORT AND SERVICE

Our best-in-class Technical Team is here for you to help with any questions or concerns. You can reach our team Monday through Friday from 9 a.m. to 5 p.m. CST.

If you need Technical Support, please email support@shadowssystemscorp.com or call 469.458.6808.

FROM THE CEO

Shadow Systems has undergone an incredible evolution since launching our first pistol five years ago. What started as a small team in a 3'x3' SHOT Show booth has grown into an operation of over 100 people offering more than 600 SKUs. We are so thankful for all the customer enthusiasm and support that has brought us to this point.

Our pistols have made it into the hands of hundreds of thousands of shooters and into the duty holsters of over 200 law enforcement agencies across the country. We now offer a full Armorer's Course and pistol training for law enforcement agencies. In 2022, we launched the successful CR920 subcompact pistol and our patent-pending, smile-inducing DR920P.

To build on this success as we move into 2023, we look forward to growing our product offering while maintaining our reputation for reliability and customer support. Our nimble approach to product development and openness to consumer feedback allows us to continue to iterate and develop more rapidly than our peers, constantly improving upon our existing products while rapidly launching new and exciting pistols.

Shadow Systems is proud to remain Veteran-led and 100% American Made with American parts and labor.

Hope to see you on the range,

TREVOR ROE
Chief Executive Officer, Shadow Systems

SHADOW
SYSTEMS

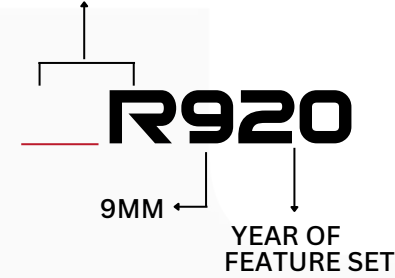

SHADOW SYSTEMS PRODUCT FAMILY

Shadow Systems' 920 Series is available in multiple sizes, built for multiple roles and use cases.

Whether you're shopping for your duty pistol, your nightstand protector, your deep concealed carry, or your weekend range gun, Shadow Systems has a 920 Series pistol to fit your needs.

Each of these sizes is available in a variety of models and configurations, detailed on the further pages of this catalog.

SUBCOMPACT

CR920

SUBCOMPACT - CR920
A covert-role pistol built for deep concealment with capacity of 13+1.

CR920P

COMPENSATED SUBCOMPACT - CR920P
Compensated covert-role pistol that shoots like a full size.

CR920X

SUBCOMPACT - CR920X
Ultra thin, high-capacity version of the CR920 pistol with capacity of 15+1.

CARRY THE BEST

COMPACT

MR920

COMPACT - MR920
The multi-role pistol that started it all carries 15+1 rounds.

MR920P

COMPENSATED COMPACT - MR920P
A flat-shooting compact featuring our ultra-efficient QD steel compensator.

MR920L

LONG SLIDE COMPACT FRAME - MR920L
A longer slide version of our multi-role pistol, providing more recoil control and faster follow-up shots.

XR920

CROSSOVER - XR920
Built as a custom request for law enforcement, this crossover pistol is fast out of the holster while packing a full 17+1 capacity.

FULL SIZED

DR920

FULL SIZE - DR920
The ultimate duty pistol packing custom features and a full 17+1 capacity.

XR920P

COMPENSATED CROSSOVER - XR920P
A flat-shooting crossover featuring our ultra-efficient QD steel compensator.

DR920L

LONG SLIDE - DR920L
A full size pistol with a 5.3 inch barrel that is great for iron sight shooters, competition, and Law Enforcement.

DR920P

COMPENSATED - DR920P
A full size pistol with an integrated compensator for the flattest shooting experience and a guaranteed smile at the range.

CARRY THE BEST

PATENTED MULTI - FOOTPRINT OPTIC CUT

An Industry First: no plates, ultra-low position, multi- footprint, giant screws.

Until now, every optic mounting design involved a series of compromises. Multi-footprint meant adapter plates, high position, and short screws. Low mounting position meant one footprint only and even smaller screws!

The Shadow Systems patented optic mount is the first to offer a bombproof solution with no compromises.

The design fits multiple, duty-rated optics without adapters that weaken the connection and require shorter screws.

Do you want to use the optic to rack the slide? So do we. The included spacers key lock into the slide and create a zero fit condition. Giant screws keep the optic where it belongs—on the gun.

Best of all, the low mounting position creates a perfect lower 1/3 co-witness with the standard height sights that come on the gun. You don't need to change the sights to have them work well with your optic.

Pictured: SS-1022

Pictured: SS-3212

FRAME FEATURES

Our frame sits ultra-low in the hand, with an extended, upswept beavertail and a dramatic trigger guard undercut. The frame features wrap-around texture aggressive enough to give a positive grip in all weather and still comfortable for daily carry. A textured recoil control ledge allows the support-hand thumb to engage, vastly reducing muzzle rise between shots.

Our frames feature the groundbreaking Shadow Systems NPOA backstrap system, which fundamentally changes the grip angle of the gun to meet the shooter's natural point of aim. It's not about small, medium, or large; it's about getting fight stopping hits at close range, under stress, whether you see the sights or not.

Shadow Systems frames have a generous internal magazine and come with an additional removable magazine well, mounting hardware, and tool, for those who want even faster reloads. Other frame features include a high-traction magazine release button, an enhanced slide-lever curtain, and compatibility with existing holsters.

Pictured: SS-3211

SHADOW SYSTEMS SLIDES

Shadow Systems slides are designed to minimize recoil and maximize control and comfort. Shadow Systems slides come in two model types, each with unique machining patterns.

ELITE MODEL SLIDE

Elite model slides feature directional serrations in front, rear, and topside of the slide. Elite slides also feature a weight optimizing window cut. All Elite slides feature our patented multi-footprint optic cut.

FOUNDATION SERIES SLIDE

Foundation Series slides feature pocket cut slide serrations and the patented multi-footprint optic cut.

MATCH-GRADE BARRELS

Shadow Systems match-grade barrels are machined in house, conventionally rifled 1-10 in., and concentricity checked. The lug geometry and barrel hood fit is slightly tighter than a conventional barrel, but not enough to compromise reliability.

Elite and Combat models feature a spiral fluting pattern. The spiral fluting pattern improves the evacuation of dirt and debris and reduces barrel weight. Foundation Series pistols have a smooth finish version of the match-grade barrel.

INTERNALS AND TRIGGER

The Shadow Systems flat faced trigger and proprietary trigger bar feature a smooth 4.5 – 5.0 lbs trigger pull and a crisp, tactile reset. Trigger take-up is slightly reduced without compromising internal safeties. All drop safeties are intact in this duty-purposed, carry-safe trigger.

Shadow Systems pistols use a modified recoil system which allows the user to adjust and tune the gun with different spring weights in the MR/DR/XR models. The included recoil spring is a conventional weight spring manufactured from high-quality chrome silicon material. All guide rods are machined steel not injection molded plastic.

All internal slide parts are machined from billet stainless steel. The extractor is our own high-reliability enhanced LCI extractor. The LCI features a serration that increases the sensation of the LCI protruding from the slide when checking by feel in darkness. The extractor features Shadow Systems proprietary geometry and material selection to enhance longevity and extraction of a wide range of ammunition.

SHADOW SYSTEMS FOUNDATION SERIES

Nothing great can be built without a solid foundation. The FOUNDATION SERIES by Shadow Systems developed out of conversations between old-school gun guys, the type who aren't fussy about aesthetics and want only the essential features. Built on the same frames as all Shadow Systems pistols, the FOUNDATION SERIES touts sleek ergonomics, real-world shootability, and bet-your-life reliability starting at \$679 for the DR, XR & MR & \$599 for CR.

DR

DR920 FS
4.5" / 17+1

FOUNDATION SERIES FULL SIZE: The ultimate duty pistol packing custom features and a full 17+1 capacity.

XR

SHADOW SYSTEMS WAR POET

Created by Shadow Systems with John Lovell's hand-selected features, the War Poet line of pistols merges Warrior Poet Society's philosophy with Shadow Systems functionality. War Poet pistols are built on the MR920, DR920, and CR920 platforms, and includes exclusive WPS color and brand elements. The differentiating features of the War Poet line are in the slide machining. John Lovell selected aggressively angled serrations in front, rear, and topside, paired with a weight-balancing window cut. All War Poet models come standard with the patented Shadow Systems multi-footprint optic cut, allowing for direct, bombproof mounting of most brands of red dot sights.

SHADOW
SYSTEMS

RANGE PROGRAM

Pictured: SS-2027

RANGE DAY PROGRAM

As you know, our product design and position in the market is grounded in the philosophy that guns should aid the user in obtaining fast and accurate hits. Putting our product in the customer's hands, while in a range environment, will help them experience the differences and advantages you may not be able to replicate at the counter. We are confident that this program will help you boost your sales of Shadow Systems products.

The program is intended for Shadow Systems brick-and-mortar retailers with an on-site range. By participating in the program, you will receive reduced pricing for Shadow Systems products designated for use on your range. You will also receive marketing and in-store display materials to help advertise Shadow Systems.

If you need assistance or have questions about the program, please contact the Shadow Systems Sales team at 469-458-6808 or sales@shadowssystemscorp.com.
